

Announcing the final international ZeroPM workshop on

Achieving Zero Pollution of Persistent and Mobile Substances

The way forward

The European research project ZeroPM: Zero Pollution of Persistent, Mobile substances, is pleased to announce its final workshop to be held on the

8th – 10th of September 2026

At the Thon Hotel EU, Brussels, Belgium

After five years of work towards supporting the EU Green Deal and the Chemicals Strategy for Sustainability, **ZeroPM: Zero Pollution of Persistent, Mobile substances** will present the tools, insights and innovations that can make these goals a reality for a **toxic free future within the European Chemicals Industry Action Plan**.

Discover how ZeroPM's interconnected **Prevention**, **Prioritization** and **Removal** strategies can stop **regrettable substitution**, accelerate the shift to **safe and sustainable alternatives**, and guide decisions on which persistent and mobile substances require urgent action. Explore cutting edge approaches to **screening**, **prioritization** and **removal technologies** for water and sewage sludge.

To prepare for the upcoming **European Chemicals Industry Action Plan**, expect expert **recommendations**, **dynamic panel discussion**, **short courses** and a **poster session**, from leading experts from the European Commission, European Parliament, National Authorities, academic institutes, the chemical and financial sectors, water utilities, NGOs and beyond.

Join us on the way forward to zero pollution of persistent, mobile substances.

Registration will open between mid April and early May and spaces are limited. If you would like to be notified when registration opens please [click here](#)

Organized by ZeroPM, The German Water Centre (DVGW-TZW) and The Norwegian Geotechnical Institute (NGI) and Milieu Law and Policy Consulting.
